Project Name	IOT based safety gadget for child safety monitoring and notification

## CREATE IBM WATSON IOT PLATFORM AND DEVICE

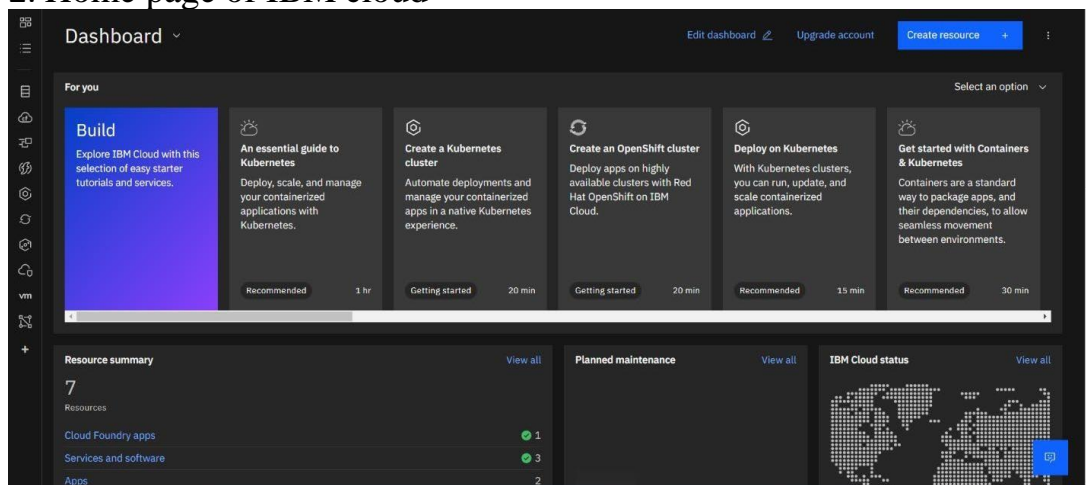

1. To create the IBM Watson IOT platform and device

### STEPS:

1. create an IBM cloud account with the individual IBM id and password

2. Home page of IBM cloud

3. Click on the catalog on the top

Search the catalog...

Sell on IBM CloudCatalog settings

Analytics Engine

By IBM

Submit your Apache Spark applications as needed and customize the Spark runtimes to satisfy the requirements of your application.

Lite • Free • HIPAA Enabled • IAM-enabled • Service Endpoint supported • IBM supported

AnonTech VizVault Platform

By Anon Technology, Inc.

Manage personal information as-a-service safely, securely, and in compliance with data privacy regulations using VizVault

Lite • Free • HIPAA Enabled • IAM-enabled • Third party supported

API Connect

By IBM

An enterprise-grade platform for creating, securing, managing, sharing, monetizing, and analyzing custom APIs located on-premises and on the cloud.

Lite • Free • EU Supported • IAM-enabled • IBM supported

App Configuration

By IBM

Centralized, in-flight configuration for web and mobile applications and distributed environments.

Lite • Free • IAM-enabled • IBM supported

App Connect

By IBM

Connect your applications, automate tasks, and improve productivity

Lite • Free • IBM supported

App ID

By IBM

User Authentication and User Profiles for your apps.

Lite • Free • EU Supported • Financial Services Validated • HIPAA Enabled • IAM-enabled • IBM supported

#### 4. Click on IoT in the category mentioned

**Internet of Things Platform**

This service is the hub of all things IBM IoT, it is where you can set up and manage your connected devices so that your apps can access their live and historical data.

**Create** About

Type: Service

Provider: IBM

Updated on: 08/15/2022

Category: Internet of Things

Compliance: IAM-enabled

Location: Frankfurt, London, Dallas, Washington DC

Related links: Docs, Terms

Select a location: Dallas (us-south)

Select a pricing plan: Lite

Plan: Lite

Features: Includes up to 500 registered devices, and a maximum of 200 MB of each data metric. Maximum of 500 registered devices. Maximum of 500 application bindings. Maximum of 200 MB of each of data exchanged, data analyzed and edge data analyzed.

Pricing: Free

The Lite service plan for Internet of Things Platform includes up to 500 registered devices, and a maximum of 200 MB each of data exchanged, data analyzed, and edge data analyzed per month.

**Existing Lite plan instance**

You can have only 1 Lite plan instance of this service per resource group. Delete your current Lite plan instance in Default resource group to create a new one, or view the existing instance.

Let's get started with IBM Watson IoT Platform

Securely connect, control, and manage devices. Quickly build IoT applications that analyze data from the physical world.

[Launch](#) [Docs](#)

Ready for the next level?

IBM Watson IoT Platform Journey

☒ Lite

The Lite service plan provides a lightweight development environment to get you started with the connectivity capabilities of Watson IoT Platform.

- Free

☐ Non-Production

The Non-Production service plan is a full-featured, fully-integrated offering that enables you to explore Watson IoT Platform to see how the service can fit into your IoT environment.

- Starts at \$500 per month

☐ Production

The Production service is a fully managed SaaS offering that enables you to manage and analyze enterprise IoT data.

- Includes IBM Service & Support

9. manage is for launch, plan gives us the idea about the payment package and its upgrades, and lastly the connection is for to connect IOT with other services

10. Click on the launch button in the manage tab, it will open to this

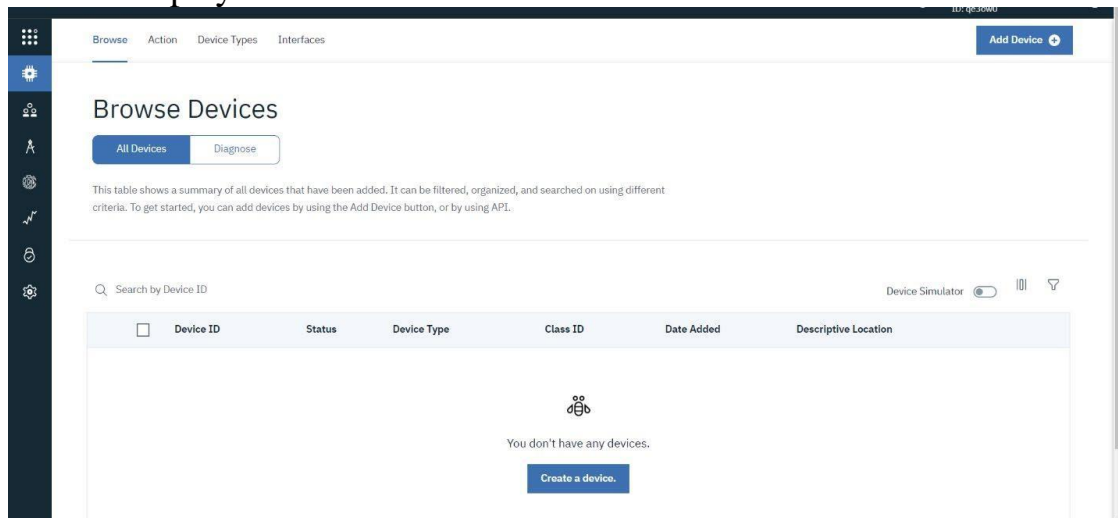

## 11. Enter the details to sign in to the Watson Cloud to create a device

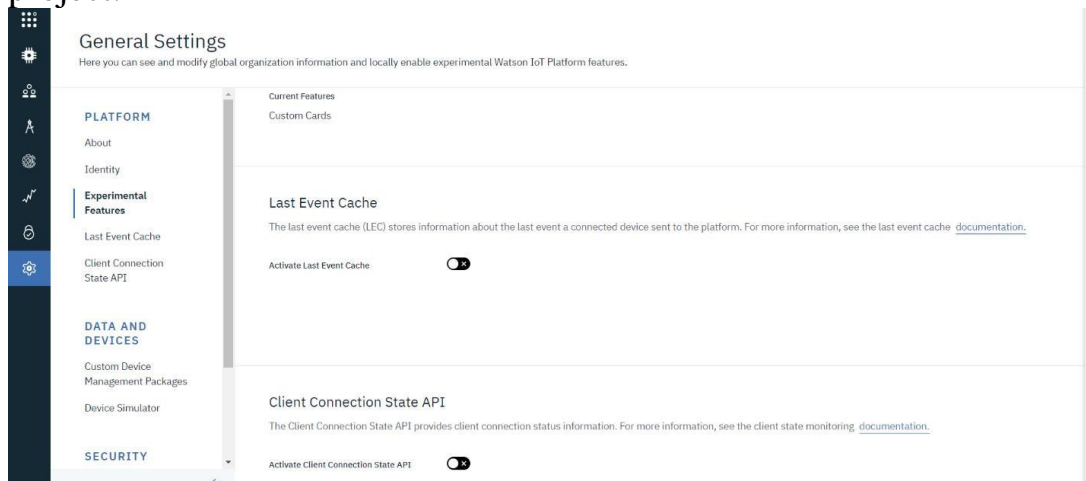

## 12. Once logged in the name will be displayed and it goes back to the first page

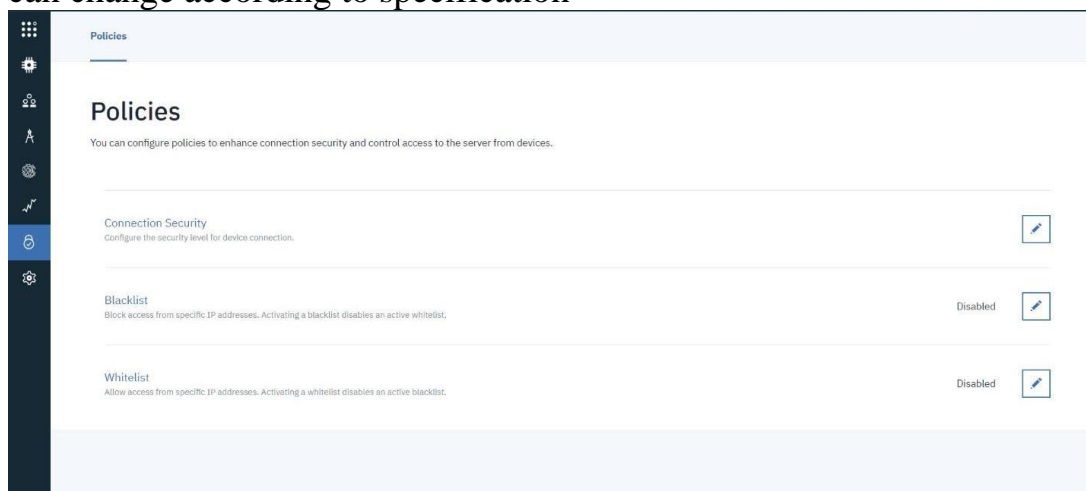

13. And again clicking on the launch button will open this tab, the device will help in the creation of the devices, the addition of devices, and the display of details of the devices.

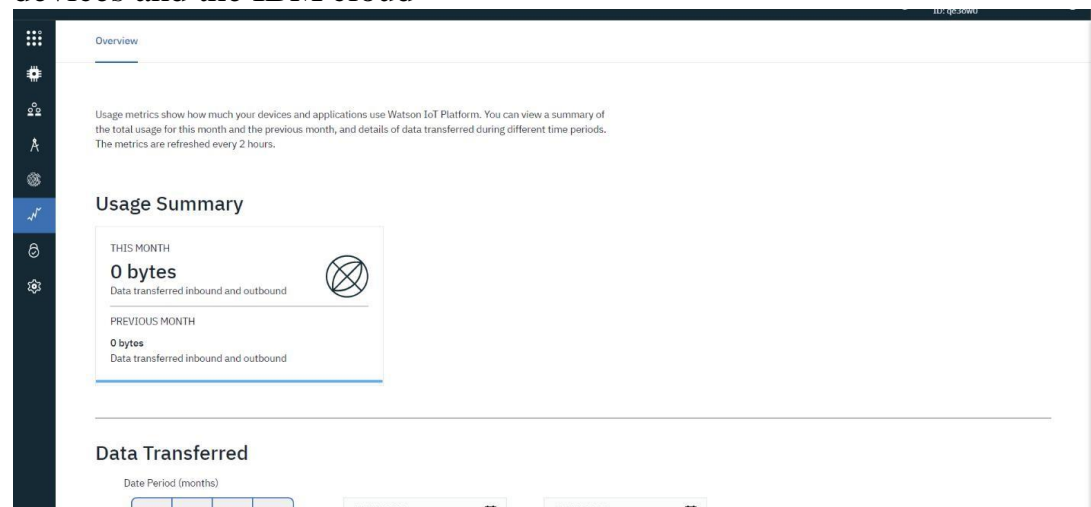

14. The setting tab is used to change the general setting if needed for the project.

15. In the security tab we can choose the type of security connection and can change according to specification

16. Usage gives the summary of how many bytes are used between the devices and the IBM cloud

17. The member tab is add the teams members to work in the platform

The screenshot shows the 'Browse Members' page in the IBM IoT Platform. It features a sidebar with navigation icons and a main content area. The 'Browse Members' section includes a search bar and a table listing members. The table has columns for 'Email Address', 'Name', 'Role', 'Added By', and 'Expires'. There is one member listed with the email 'worldisfullofmeow@gmail.com' and the role 'Administrator'.

<input type="checkbox"/>	Email Address	Name	Role	Added By	Expires	
1 result						
<input type="checkbox"/>	worldisfullofmeow@gmail.com	worldisfullofmeow@gmail.com	Administrator	-	-	

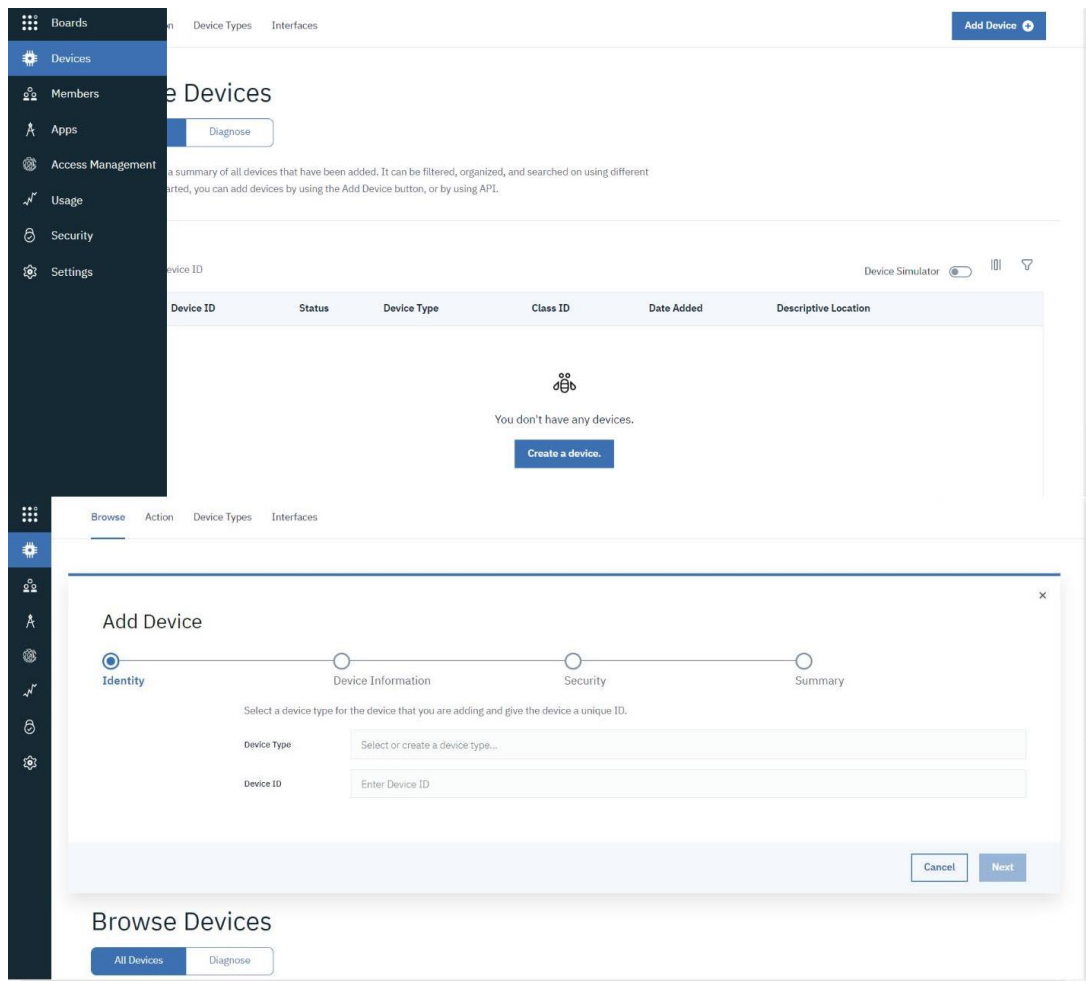

18. This tab is used when you want to connect to some other platform and to integrate with other services.

The screenshot shows the 'Browse API Keys' page in the IBM IoT Platform. It features a sidebar with navigation icons and a main content area. The 'Browse API Keys' section includes a search bar and a table listing API keys. The table has columns for 'Key', 'Description', 'Role', and 'Expires'. There are no results shown. Below the table, there is a message 'There are no API Keys' and a button 'Generate API Key'.

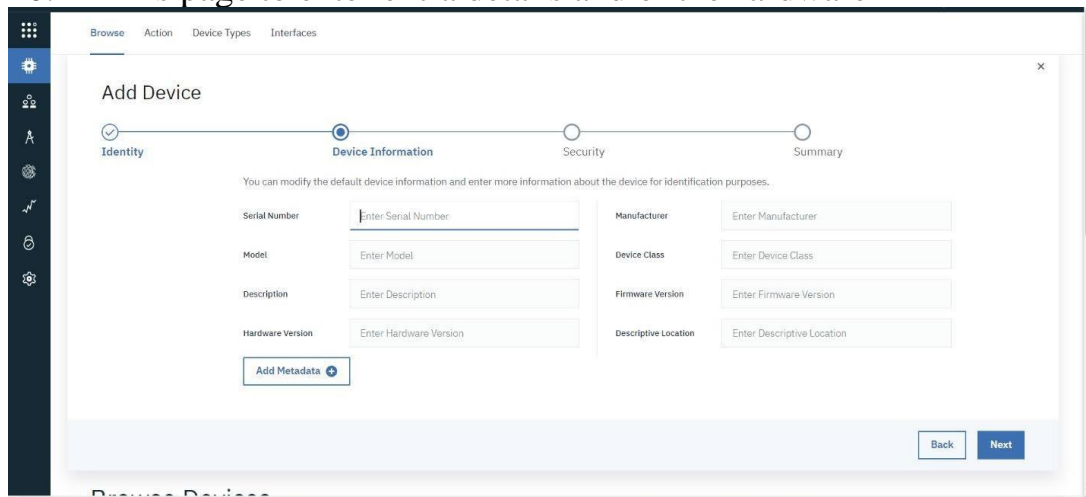

<input type="checkbox"/>	Key	Description	Role	Expires	
0 results					

There are no API Keys  
Generate API Key

19. Click on the device tab and click on the add device button, then give the device type and device id and click next

20. This page to enter extra details and of the hardware

21. Clicking next it goes to the security where we do authentication token id.

The screenshot shows the 'Add Device' wizard in the 'Security' step. The progress bar at the top indicates four steps: Identity, Device Information, Security (current), and Summary. The main content area is titled 'Add Device' and contains two options for selecting a device authentication token. The first option, 'Auto-generated authentication token (default)', is selected and shows a generated token '1997199520012005' in a text box. The second option, 'Self-provided authentication token', is unselected. Below the text boxes, there is a warning message: 'Make a note of the generated token. Lost authentication tokens cannot be recovered. Tokens are encrypted before being stored. Authentication tokens are encrypted before we store them.'

22. Clicking on next it goes to the summary of the device then click finish

The screenshot shows the 'Add Device' wizard in the 'Summary' step. The progress bar at the top indicates four steps: Identity, Device Information, Security, and Summary (current). The main content area is titled 'Add Device' and contains a verification message: 'Verify that the following information is correct then select Finish'. Below this, the following information is displayed: 'Device Type: Nodemcu', 'Device ID: 199795', and 'Security Token: 1997199520012005'. There is a 'View Metadata' button next to the Device ID. At the bottom right, there are 'Back' and 'Finish' buttons.

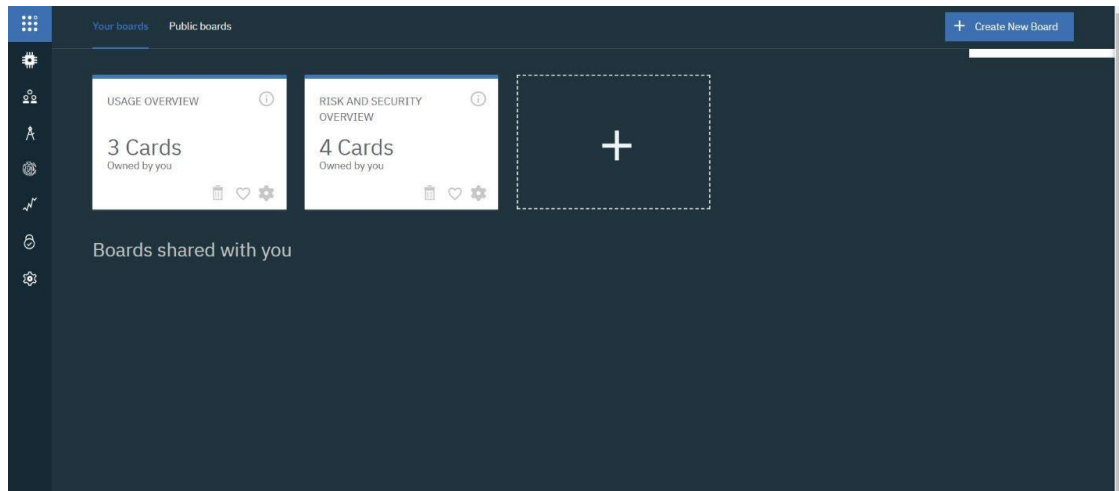

23. The device credentials will be displayed with all the details

24. Safe the details of the device as the authentication tokens are non recoverable and if misplaced then we have to create a new one.

25..Clicking on the device tab we can now see the added device. Clicking on it will display the other details. It has different tabs like Identity, Device Information, State and login.

In a similar way, we can create n number of devices with a 50 per page limit as per the requirement of our project

26. The Boards will display card for the project.

## CONCLUSION:

An IBM Watson cloud for IoT and a device is created
